Subject: Follow Up Questions re: Harvey Response

Carolyn and Cary,

Thank you for putting together the conference call today on EPA's response to Hurricane Harvey. In response, I wanted to ask two quick questions.

First, I wanted to ask whether EPA been able to identify the source of the strange odor that has been reported in the Houston-Manchester area and other neighborhoods near the Houston Ship Channel. If not, what steps are being taken to identify the odors and whether they have a potential impact to human health and the environment?

Second, can EPA provide a list of drinking water systems in Harris County, Texas that currently have boil water notices or are shut down?

Much thanks,
Sergio
